SUMMARY

Full-stack web developer with a background in Informatics Engineering and a strong interest in modern web development using TypeScript, Next.js, React, Node.js, and PostgreSQL. Enjoys building web apps end to end, from database design and REST APIs to responsive interfaces, and has built Laravel and MySQL applications such as a real estate management system, a property e-catalog, and a client e-ticketing platform. Uses AI-assisted tools (Claude Code) to work faster while reviewing and testing every change. Open to full-time and remote roles.

EDUCATION

Universitas Bengkulu **2018 - 2025**
Bachelor of Computer Science (Informatics Engineering) - GPA: 3.55 / 4.00
Final Project: Detection of Whiteflies (Aleyrodidae) Pests on Cucurbitaceae Crops Using YOLOv11

SKILLS

Languages: JavaScript, TypeScript, PHP, Go, Python, Java, SQL, HTML, CSS
Frontend: React, Next.js, Vue.js, Svelte, SvelteKit, Tailwind CSS, Vite
Backend: Node.js, Express.js, Hono, Laravel, Socket.IO, REST API
Databases: PostgreSQL, MySQL, Drizzle ORM
Tools & DevOps: Git, GitHub Actions, Docker, Nginx, Vercel, Google Cloud Platform, Vitest, Figma
AI / ML: Machine Learning, Artificial Intelligence, YOLO (Ultralytics), TensorFlow.js
IT Support: Technical Support, Ticketing Systems
Practices: Agile (Scrum), Code Review, Web Scraping, AI-Assisted Development (Claude Code)

PROJECTS

Property E-Catalog: Laravel, PHP, MySQL **Jan 2024 - Aug 2024**
github.com/Zen1710/KatalogWeb

- Built a property e-catalog and admin panel for PT. Duta Idaman Property where clients browse houses, villas, apartments, and hotels for sale or rent.
- Implemented search by name or address with price, bedroom, and bathroom filters, plus property pages with photos, floor plans, facilities, and Google Maps location.
- Added site-visit requests that staff schedule by assigning an agent, property reviews, and admin management for listings, agents, partners, FAQ, and accounts.

Whitefly Detection with YOLOv11: Python, Ultralytics, TensorFlow.js **Jul 2025**
github.com/Zen1710/YOLOv11_detectionWhiteFlies | Demo: zen1710.github.io/YOLOv11_detectionWhiteFlies

- Trained a YOLO11n model with Ultralytics on 2,824 training and 339 validation images annotated in Roboflow to detect whiteflies and five cucurbit host plants.
- Exported the model to TensorFlow.js so detection runs fully in the browser from a webcam or uploaded image, showing detection counts, average confidence, and an infestation risk level.

WORK EXPERIENCE

IT Helpdesk: PT. Telkom Akses **Jan 2026 - Jul 2026**

- Handled IT incident management through a ticketing system, covering logging, prioritization, and status tracking until resolution.
- Performed first-level troubleshooting and escalated technical issues to the appropriate support teams.
- Documented recurring issues and resolutions to support knowledge management and service continuity.

Web Developer Intern: PT. Duta Idaman Property **Jan 2024 - Aug 2024**

- Developed a centralized Real Estate Management Information System (MIS) and E-Catalog using the PHP Laravel framework and MySQL database to optimize data handling for PT. Duta Idaman Property.
- Engineered core modules for the management and monitoring of housing data, service portfolios, and cooperative partnerships, significantly improving administrative efficiency.
- Implemented a robust, web-based platform to serve as the single source of truth for housing information, ensuring accurate and real-time data access for internal stakeholders and external clients.

Web Developer Intern: KJA Ahmad Syahfuddin **Jan 2021 - Jun 2021**

- Developed a dedicated client E-Ticketing platform utilizing the PHP Laravel framework to digitalize and centralize all customer service requests and incident reports.
- Engineered a structured workflow for ticket management, which systematically documents and prioritizes client inquiries, resulting in optimized service tracking and resolution times.
- Implemented a unified service portal enabling clients to report issues and request services directly, significantly improving communication efficiency and the overall professionalism of client service delivery.

CERTIFICATIONS

Full-Stack Development: Mimo **Nov 2026**

- Covered HTML and CSS, core JavaScript and single-page applications with React, backend APIs with Node.js and Express, SQL databases, and building full-stack applications end to end.

Back-End Development: Mimo **Nov 2026**

- Covered core JavaScript, backend API creation with Node.js and Express, database management with SQL, and working with modules and APIs.

Front-End Development: Mimo **Oct 2026**

- Covered HTML essentials and CSS techniques for styling web pages, core JavaScript programming, and single-page application development with React.

Artificial Intelligence with Machine Learning in Java: Oracle Academy (Course Completion) **Aug 2022**

- Completed all coursework on AI and machine learning principles and implementing machine learning algorithms in Java.

Artificial Intelligence with Machine Learning: Oracle Academy (Final Exam Completion) **Aug 2022**

- Passed the course final exam on AI and machine learning fundamentals, from data handling to model evaluation.

Java & AI Development Bootcamp: FGA UNAND with Oracle **Aug 2022**

- Completed comprehensive training in Artificial Intelligence and Machine Learning principles.
- Mastered fundamental concepts of AI/ML algorithms and their practical implementation within a Java environment.
- Demonstrated proficiency in core machine learning pipelines, from data handling to model evaluation.
